

Remote-family viewing checklist

Help loved ones join from afar with a small test and a clear backup plan.

Date / time / time zone

Operator / backup

Use this to prepare a video call or stream you arrange. It does not include or guarantee a service, connection, access or recording.

Before sharing an invitation

- ☐ Choose the platform; check current account and access requirements.
- ☐ Confirm venue approval and permission from people being filmed.
- ☐ Check music and recording permissions; do not assume they are included.
- ☐ Choose invited viewers and share the link privately.

Run a real rehearsal

- ☐ Test at the venue with the actual account, camera, sound and connection.
- ☐ Ask a remote family member to join and confirm clear picture and sound.
- ☐ Test power, charging, camera placement and an operator backup.
- ☐ Write the start time and time zone; send simple joining instructions.

Prepare for changes

- ☐ Choose a fallback: a later call or an approved short recording.
- ☐ Tell viewers who to contact if the link fails; never promise a live connection.
- ☐ Check who can view any replay and remove access when no longer needed.
